    for (var s = 0; s < sections.length; s++) {
        var el = document.getElementById(sections[s]);
        if (!el) continue;
        if (scrollPos >= el.offsetTop && scrollPos < el.offsetTop +
el.offsetHeight) {
            for (var l = 0; l < links.length; l++) {
                links[l].classList.remove("active");
            }
            // Match link by href
            for (var l2 = 0; l2 < links.length; l2++) {
                if (links[l2].getAttribute("href") === "#" + sections[s]) {
                    links[l2].classList.add("active");
                }
            }
        }
    }
});

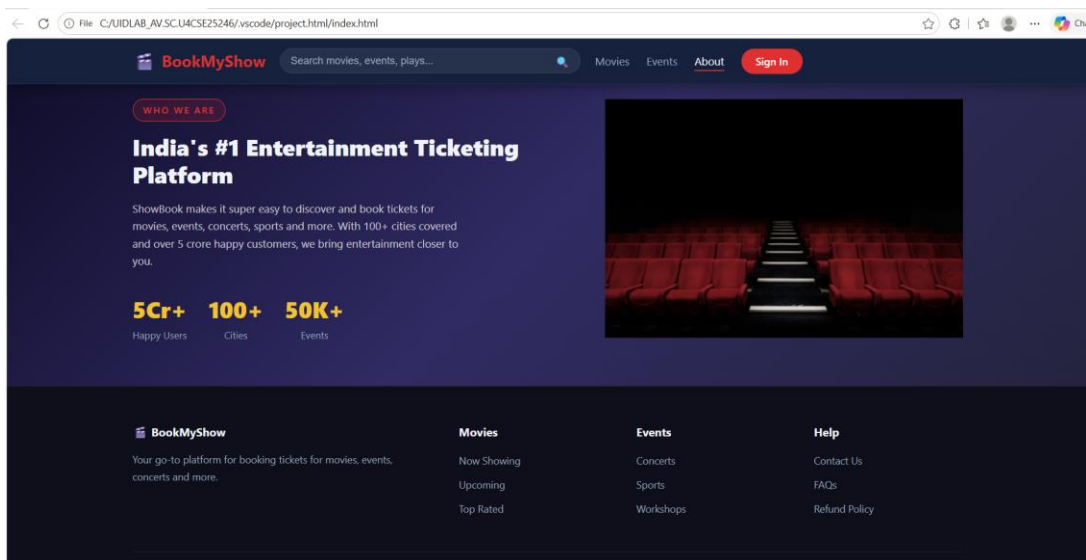

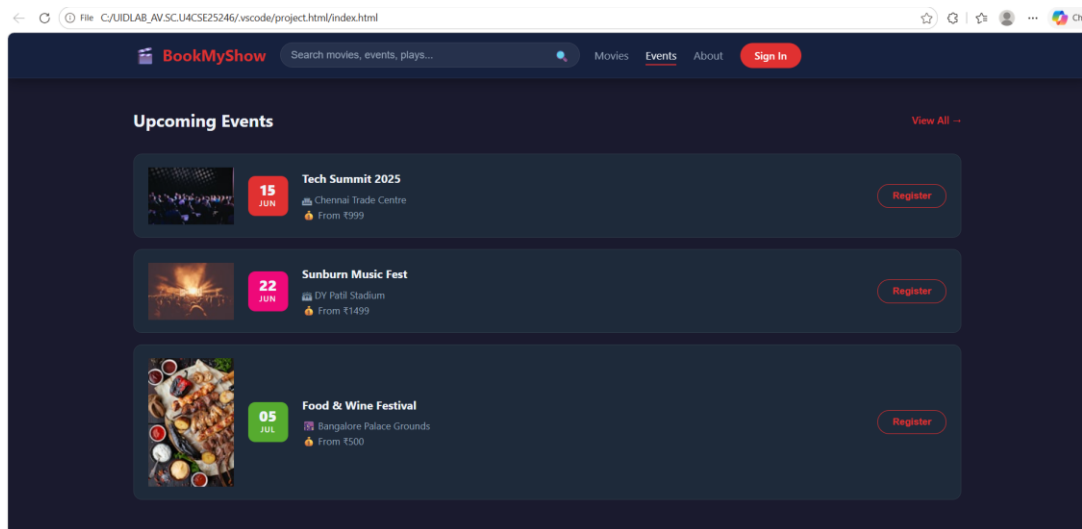

// --- CARD HOVER SOUND EFFECT (subtle) ---
// Just a small DOM trick: adds a short scale animation on card hover
var allCards = document.getElementsByClassName("card");
for (var c = 0; c < allCards.length; c++) {
    allCards[c].addEventListener("mouseenter", function () {
        this.style.borderColor = "rgba(224, 49, 49, 0.3)";
    });
    allCards[c].addEventListener("mouseleave", function () {
        this.style.borderColor = "";
    });
}

```

OUTPUT:

EXPLANATION:

Your BookMyShow project is a modern entertainment ticket booking web application built using HTML, CSS, and JavaScript. It allows users to explore movies, events, music shows, and sports in a visually rich interface.

The navigation bar is fixed and includes a search box, links, and a mobile-friendly hamburger menu.

The hero section contains an auto-sliding banner showcasing featured content with smooth transitions and interactive dots.

Category tabs enable filtering of cards dynamically using JavaScript, improving user experience.

Each movie or event is displayed as a card with images, ratings, and a booking button. The search function lets users find shows by title and highlights matching results.

A booking modal system allows seat selection, price calculation, and confirmation with real-time updates.

CSS Grid and Flexbox are used for layout structure, while animations and transitions enhance interactivity and visual appeal.

The website is fully responsive, adapting to mobile and desktop screens. JavaScript handles DOM manipulation, event listeners, slider control, filtering, and toast notifications.

Overall, this project demonstrates strong frontend development skills, combining UI design, interactivity, and user-friendly booking functionality similar to real-world platforms like online movie ticketing systems.
